junktion people believe that there is enough stuff in the world as it is. we don't throw away, we collect . We believe that once people stop fixing things its the beginning of an end. We like fixing things rather than replacing them. To what we can not fix we try and give a second life as something else. Something useful, something that still shows the previous form, something that smiles at the previous form.

## **ANYthing can be EVERYthing.**

We like things that show wear (the rust on metal, the cracks in wood, the scarping of old paint are all expressions of time on matter. They too can be beautiful). junktion people like craftsmanship. We aspire to be craftsmen to the stuff that we find. We love the old handicrafts and trades that cease to exist (cobbling, engraving, smithery, welding, carpentry, tailoring, upholstering). We would like to see these handicrafts in years to come, they will never provide us with the perfect piece, but always soulful, perfect in it's imperfection.

junktion is a design and art studio opened in 2008 in Tel-Aviv, Israel. Our focus is reuse and upcycle design and art, trying to give a second chance to what the world has already classified as junk. We take everyday objects out of context and try to look at them in a new way. Most of the raw material is found in the streets, in junkyards and in flea markets around the world. The majority of our works are unique items.
